Blood Bank Management System

Requirements:

The Blood Bank Management System is running on the official website of the govt, blood bank. Mainly there are 2 actors in the Blood Bank Management System. The Blood Bank Management System provides some advanced features to the Blood Bank Management System admin than the donor. If the Blood Bank Management System admin logs in, the Blood Bank Management System interface provides some main command buttons to the admin.

- Change login password.

- Edit donor profile details.

- Search donors for an exact blood group and send messages.

- Print statements.

- Update the database.

- Send blood testing details.

- Search details from the database.

If the donors log in, the Blood Bank Management System will provide another different interface with different Commands.

- Change login passwords.

- Edit personal contact details

- Details related to contributions to donations.

- Future blood donation details.

- Withdraw the name from the Blood Bank Management System.

It has been required that every form's interface should be friendly and simple to use
